Star

A vaulted ceiling in the spacious family room and nine-foot-high ceilings in the rest of the house add interior volume throughout this affordable, easy-living home. This Star shines in many other areas, too:

- A long front porch welcomes guests while providing a sheltered front entry
- The kitchen/dining room has an informal open layout, French doors to the back deck, and a handy washer/dryer nook
- “Split bedroom” design creates added privacy for the sleeping areas
- Large master suite features triple windows and a luxurious private full bath with double vanity, walk-in closet, linen closet, garden tub, and separate shower
- An optional brick veneer version (available for most Standard Homes plans) offers an extremely long-lasting, low-maintenance exterior

STAR Plan No. 2-CS
Overall Dimension: 44'-0"
Heated Area: 1258 sq. ft. in siding
Porch: 130 sq. ft.
Deck: 100 sq. ft.
